

# *Dream of a Green Christmas This Year*

For the fifth year in a row, the Capitol Christmas Tree is a shining example of green leadership that inspires others across the country to make greener choices in their own lives. The tree features energy-efficient LED holiday string lights that use 90% less energy, and last 10 times longer.

Make sure these actions are on your holiday “To Do” list:

- Put your outdoor lights on a timer to control energy use.
- Choose recyclable wrapping paper and biodegradable ribbon and reuse them – don’t send them to a landfill.
- Send holiday cards made from recycled paper and soy-based inks.
- Plan and combine holiday shopping trips to save gas.
- Compost your tree or buy a potted tree that you can plant after the holidays.

WE HAVE THE  
**POWER** TO SAVE  
ENERGY
